Scientific discovery and human progress go hand in hand. This new series, From Research to Reward, demonstrates how advances in our understanding of natural processes often lead to surprising and remarkable benefits for society. The National Academy of Sciences is pleased to share true stories of the men and women who strive to solve the puzzle of how the world works and who creatively apply new scientific knowledge to make it a better place.

View Outreach Toolkit
Thank an economist

The lives of hundreds of U.S. kidney patients are saved each year because of a unique donor matching system developed by an economist. Learn more about how economists and other scientists are responsible for surprising and remarkable benefits for society:

#research2reward

NATIONAL ACADEMY OF SCIENCES

Thank a psychologist

Thousands of rear-end collisions are prevented each year because of center-mounted brake lights first conceived and researched by a psychologist. Learn more about how psychologists and other scientists are responsible for surprising and remarkable benefits for society:

Thank a political scientist

Terrorist attacks can be thwarted because political scientists are able to apply mathematical models to patterns of human behavior to keep adversaries at bay. Learn more about how political scientists and other scientists are responsible for surprising and remarkable benefits for society:
